

3D ENDOSONOGRAPHY OF THE PELVIC FLOOR - ANAL/RECTAL ENDOSONOGRAPHY

PRACTICAL INTERACTIVE COURSE ON BK MEDICAL ULTRASOUND DEVICE

This interactive course will introduce participants to the techniques of EUS assessment of the pelvic floor. During the course, each participant will work using an ultrasound system. The practical training on the system will help participants visualize individual structures, which can assist in diagnosis.

The course is available for physicians with or without experience using EUS.

Date/Time:  *May 10, 2020: 8 hours (Including lunch and coffee)*

Venue:  *Magen Darm Zentrum - Cologne, Germany
(Genovevstrasse 9)*

Agenda:

- *Normal anatomy of the pelvic floor*
- *Different access possibilities*
- *Transanal EUS*
- *Assessment of pelvic floor insufficiency*
- *Assessment of urethrocele*
- *Assessment of enterocele*
- *Assessment of bladder neck blood perfusion*
- *Differences in anatomy man/woman*
- *Perineal EUS*
- *Transvaginal EUS*
- *Assessment of cystocelen*
- *Assessment of rectocele*
- *Evaluation of implanted material (TVT)*
- *Assessment of RV fistula*

In this course you will be able to work on real clinical cases, which have been uploaded to each scanner. These will be discussed and explained. The course only has room for a small group of participants (max. 12 persons), which means that there will be an ultrasound system for every two participants, guaranteeing hands-on work with the techniques.

Workshop Fee:

The workshop fee is EUR 400 (incl. VAT)
Accommodation and transportation are not included in the fee.
